

# PAIN MEDICINE AND PALLIATIVE CARE

*Enhancing quality of life for cancer patients and their families*

Huntsman Cancer Institute's Pain Medicine and Palliative Care (PMPC) Program offers medical treatments and complementary therapies. We help address physical, emotional, and interpersonal needs at the time of diagnosis, during or after cancer treatment, or with progressive disease.

Our goal is to provide supportive services that will enhance the patient's course of treatment and optimize quality of life for patients and their families.

Services include the following:

- Management of pain and other symptoms of cancer and its treatments
- Mental health and spiritual support
- Assistance with medical decisions and advance care planning
- Holistic medicine
